

Amendments to the Drawings:

The attached set of drawings includes changes to FIGs. 6A and 7C. The attached set of drawings, which includes the replacement sheets for FIGs. 6A-6B and 7A-7C, replaces the original sheets.

FIG. 7C was originally filed as an informal drawing in the application, but was not included with the formal drawings filed on February 25, 2003. FIG. 7C is now properly included on sheet 6 of the attached set of drawings, along with FIGs. 7A and 7B. In addition, FIG. 6A is amended on sheet 5 of the attached set of drawings to more closely represent the informal drawings as originally filed in the application, along with FIG. 6B.

A marked-up version of the drawings, with revisions shown in red, is included with the amended drawings. Entry of the attached set of drawings, including the amended drawings, is respectfully requested.

Attachment: Complete Set of Drawings, including Replacement Sheets
Annotated Sheets Showing Changes

REMARKS

The drawings are amended to correct the inconsistency between the drawings and the specification noted in the Notice of Drawing Inconsistency with Specification dated April 7, 2005. Applicant notes that informal FIG. 7C was originally submitted with the referenced application upon filing of the application on January 4, 2002. FIG. 7C was mistakenly omitted from the formal drawings filed on February 25, 2003. Replacement sheet 6 of the attached set of drawings now properly includes formal FIG. 7C. The version of formal FIG. 6A that was submitted with the formal drawings filed on February 25, 2003 was missing elements 23, 32, and 33, which were included in the informal drawings as originally filed in the application. Replacement sheet 5 of the attached set of drawings now properly represents the missing elements. Entry of amended sheets 5 and 6, including formal FIGs. 6A and 7C, is respectfully requested.

Applicant further notes that formal FIG. 10 was previously revised in the Transmittal of Revised Formal Drawing, filed on September 24, 2003. Revised formal FIG. 10, as submitted on September 24, 2003, is enclosed herewith in the attached set of drawings.

If any additional information is required, it is requested that the United States Patent and Trademark Office contact the undersigned.

Respectfully submitted,
